

RETROSUPERFUTURE

SS25

RETROSUPERFUTURE is a leading brand producing outstanding contemporary eyewear. Founded in Italy in 2007 by Daniel Beckerman, RETROSUPERFUTURE has become highly popular for its eclectic collection of colorful acetate sunglasses.

Starting from a classic, clean silhouette, RETROSUPERFUTURE has gradually built up its impressive collection, currently comprising of a long list of timeless yet cutting edge shapes.

Since its inception, RETROSUPERFUTURE's goal was to develop high quality eyewear, with a distinctive design at an affordable price. Entirely handmade in Italy, RETROSUPERFUTURE eyewear is produced by some of the world's best eyewear manufacturers, known for their experimentation with new production techniques, finishings, materials and detailing.

By teaming with exclusive companies like the German ZEISS, RETROSUPERFUTURE has added a layer of quality eye-protection perfect for an extended everyday use.

MATERIALS

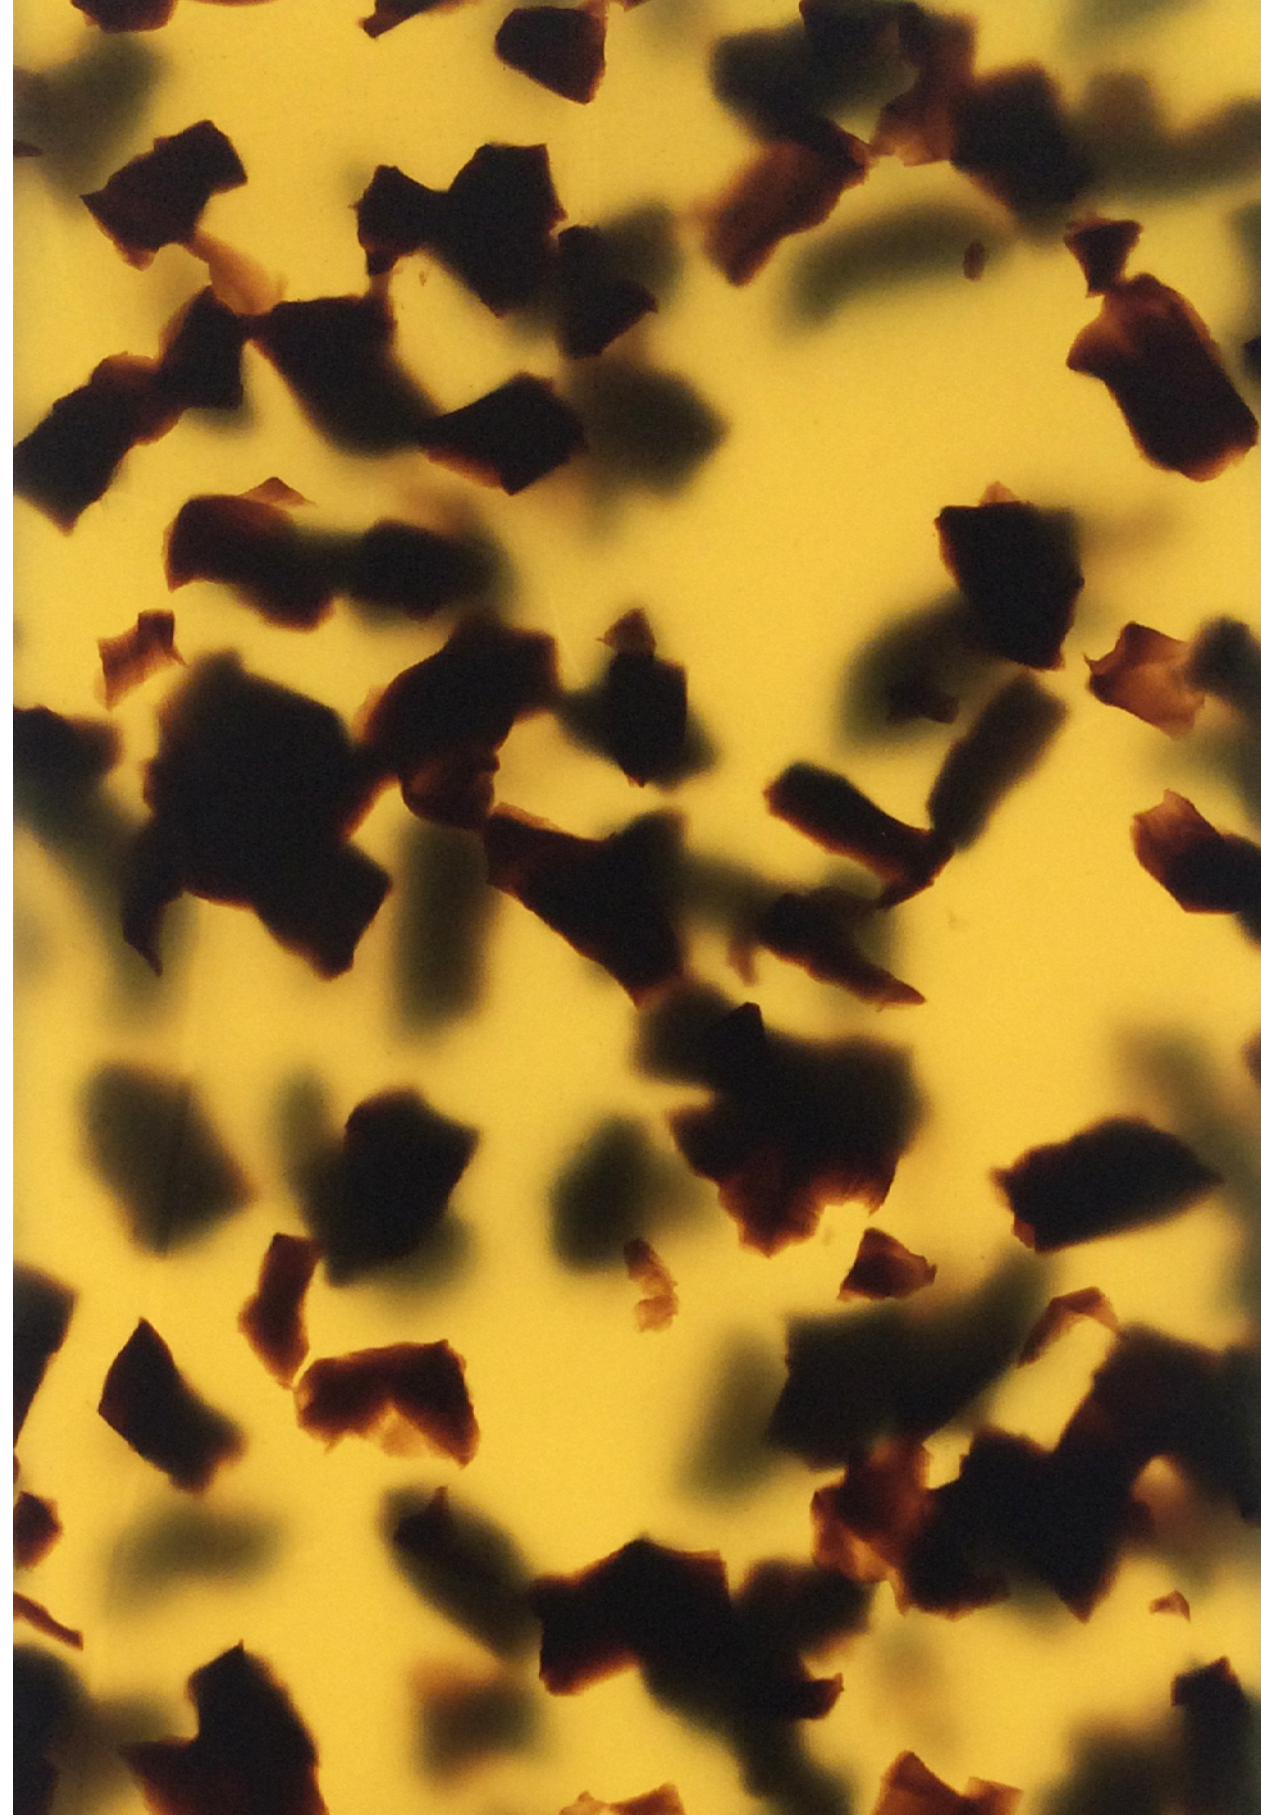

LENSES

RETROSUPERFUTURE works with the highest quality partners for all its components and material. In eyewear, lenses are an essential responsibility, a medical responsibility that needs extra-specific attention.

We do not mess around with your vision. This is why RETROSUPERFUTURE selects the leading partners for its lens manufacturing, from ZEISS to Dalloz for the CR-39 and Nylon lenses, to Barberini for all of the mineral glass lenses. Whether it be technical, clarity or lightness to characterize that specific RETROSUPERFUTURE silhouette, the outcome is a high-grade, professional and comfortable lens for an everyday use.

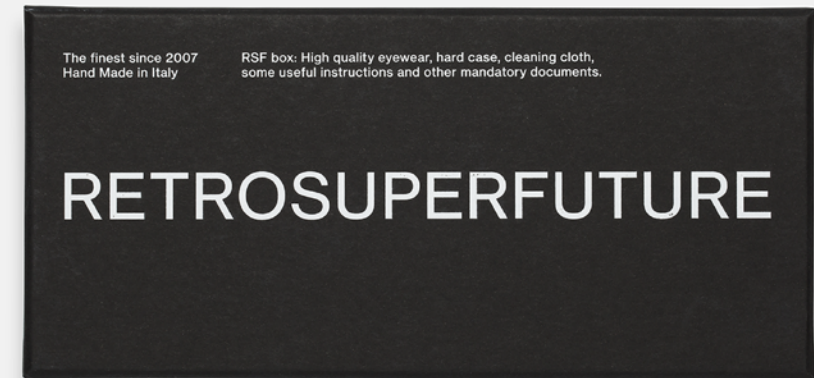

FRAMES

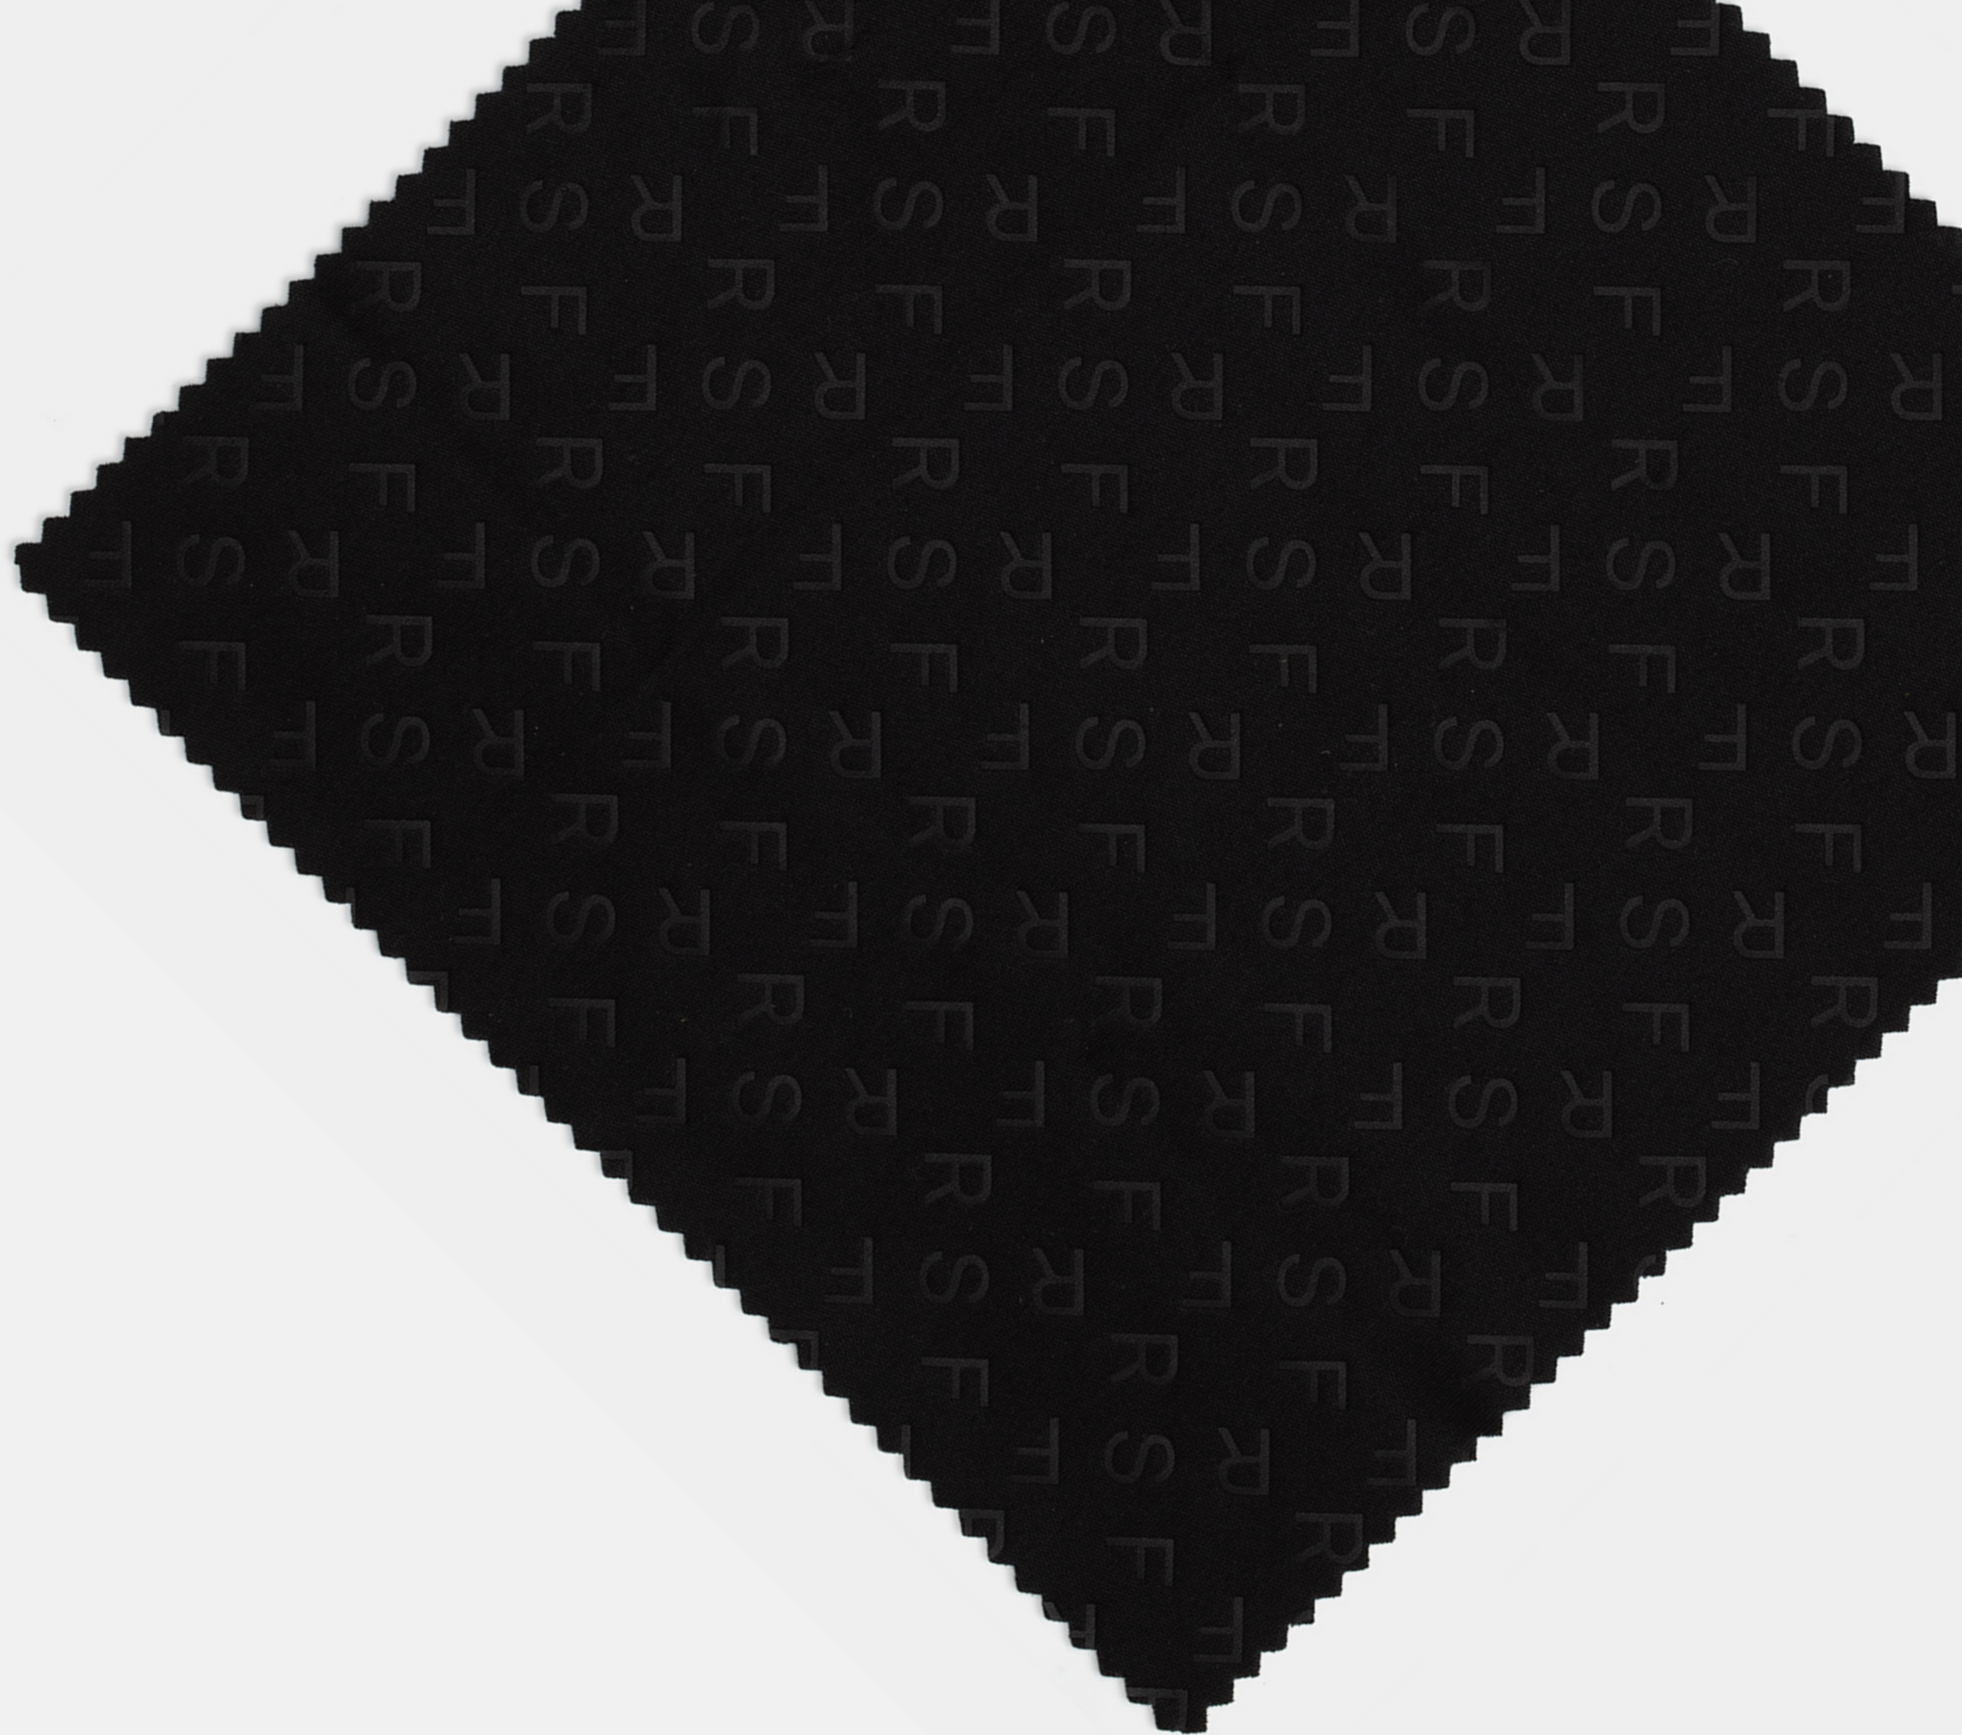

Signature RETROSUPERFUTURE acetate is manufactured from natural materials—namely wooden pulp and/or cotton powder—and is produced in large sheets by Italian manufacturers. Metallic frames are made from German silver, while other used include monel and bronze.

Known for its impeccable attention to details, RETROSUPERFUTURE has given particular care to the design of its packaging. Conceived to offer the best possible protection for the sunglasses, the packaging also reinforces RETROSUPERFUTURE's distinctive brand identity.

The packaging consists of a black cardboard box containing a soft leather case and a white textile protective pouch for the sunglasses. The packaging comes wrapped in light grey cardboard casing, which is to be removed before sale to the client. The box also contains an instructive leaflet with information about the product.

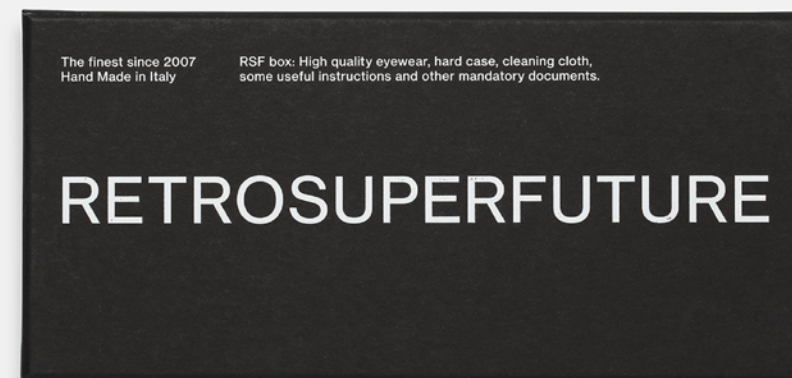

The packaging design for RETROSUPERFUTURE's products follows the needs of its distinctive lines of glasses.

For Optical frames, the packaging includes the iconic RETROSUPERFUTURE branded black box as well as a hard-shell case, designed for optimal protection of glasses.

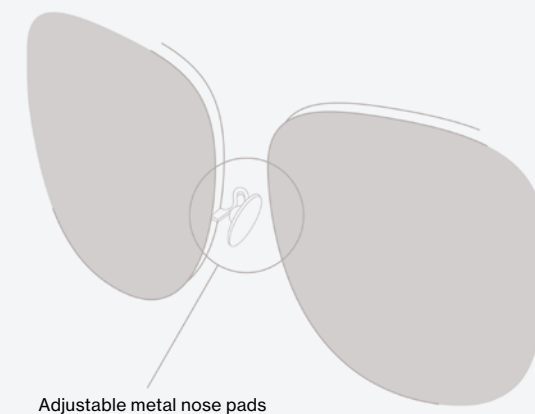

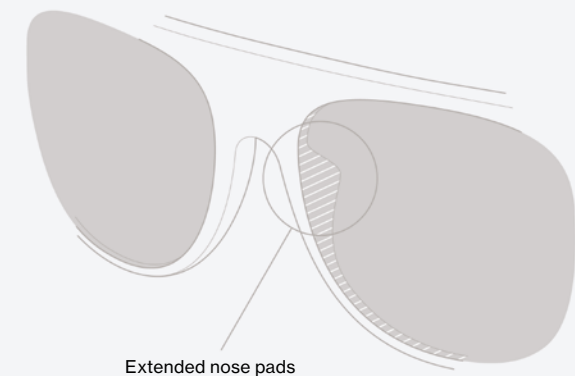

The packaging contains a white protective pouch and black case with embossed RETROSUPERFUTURE branding. It comes wrapped in light grey cardboard casing which is to be removed before sale to the client.

LOW BRIDGE FIT FOR ASIA

For RETROSUPERFUTURE, eyewear design does not only need to be beautiful, but also has the responsibility of function and comfort. RETROSUPERFUTURE Low Bridge Fit features exclusive designs with specific calibers, extra acetate on the nose bridge for a tailored fit, as well as extra-long and adjustable nose pads for all the designs with the metal components.

These specific implementations make sure that RETROSUPERFUTURE eyewear can functionally and comfortably fit our global clients.
